### EDUCATION

2022-2025

SHIVAJI UNIVERSITY

- Bachelor of Science in Computer Science
- CGPA: 8.40

### SKILLS

- Programming Language – Python
- Database - SQL
- Excel - VLOOKUP, Pivot Tables
- Python Libraries - NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn
- Visualization - PowerBI, Excel
- Data Cleaning & Data Analysis
- Dashboard Creation & Reporting

### LANGUAGES

- English
- Marathi
- Hindi

### CERTIFICATION

SQL (Basic) Certificate [Link](#)

Cognifyz Internship Certificate [Link](#)

### PROFILE SUMMARY

Data Analyst with hands-on experience in Python, SQL, Excel, Pandas, and NumPy. Skilled in data cleaning, data transformation, automation, and reporting. Strong understanding of SQL queries, Excel dashboards, and data validation. Experienced in working on real-world datasets, performing exploratory data analysis (EDA), and generating actionable business insights. Strong analytical and problem-solving skills

### TRAINING

Codenera Pvt Ltd

NOV -2025

TRAINEE

- Skills Acquired: Python, PowerBI, SQL, EXCEL
- Python (Libraries): NumPy, Pandas, Matplotlib, Seaborn, Scikitlearn
- Description: Completed a hands-on Data Science and Data Analysis training program, working on real-world projects using Python, SQL, and EDA to generate meaningful insights.

### PROJECTS

#### Blinkit Sales & Outlet Performance Dashboard [Link](#)

- Cleaned and preprocessed sales data (8,000+ records) using Python (Pandas, NumPy), handled missing values, and standardized categorical data.
- Demonstrated skills in data cleaning, analysis, visualization, business insight generation, and reporting.

#### Brain Tumor Detection [Link](#)

- Built a CNN-based deep learning model for medical image classification to detect brain tumors with improved accuracy.
- Applied image preprocessing, data augmentation, and model evaluation techniques to enhance performance.
- Trained and tested the model using TensorFlow and Keras for accurate prediction and classification.

#### Real Estate Price Analysis [Link](#)

- Analyzed real estate pricing trends using Python, SQL, and Power BI to generate business insights.
- Performed data cleaning, exploratory data analysis (EDA)

### DECLARATION

I hereby declare that the information provided above is true to the best of my knowledge and belief.

Name: Ajay Yadav
